President's Comment

Dear fellow Theosophists,

2012 has come, with fond memories of those who supported Orewa lodge last year. Thank you so much to all of those who attended and who kept their financial support of Theosophy in Orewa going. It is the members who are the Lodge life and breath.

2012 had a tremendous beginning with the Hamilton Convention. As Vicky Pennington, the Hamilton President, said, "The convention developed a life of its own, with a flow of positive energy that was both palpable and exciting." Tim Boyd, National American President, gave 3 talks that held answers and produced questions for further development. There seemed to be very few moments when he was not talking/listening to those who were there. Ted Harper displayed the delights of Mathematics as the foundational song of the Cosmos. The Venerable Tenzin gave us a verbal picture of the network that exists between us all, and the unity that flowed in the convention lived it. Talks and Stories from Gary Cook blessed us with warmth and contentment. Murray Stentiford's Communication Workshop gave insightful interaction on the broad variety of experience and thought each of us has. A blessing of Theosophy is to enjoy the different expressions of the Immortal Ruler which dwells in all sentient life.
